Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application,

☒ claims Nos. 18-21, 23-26

because:

☒ the said international application, or the said claims Nos. (with respect to industrial applicability) relate to the following subject matter which does not require an international preliminary examination (specify):

see separate sheet

☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. are so unclear that no meaningful opinion could be formed (*specify*):

☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.

☐ no international search report has been established for the said claims Nos.

☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:

the written form

☐ has not been furnished

☐ does not comply with the standard

the computer readable form

☐ has not been furnished

☐ does not comply with the standard

☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-*bis* of the Administrative Instructions.

☐ See separate sheet for further details

Re Item III

Claims 18-21, and 23-26 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(I) PCT).

Re Item V

Reference is made to the following documents:

D1: WO 01/66546

- 1) The subject-matter of present claims 1-29 is new (Article 33(2) PCT, cf. below).
- 2) The subject-matter of claims 1-29 does not involve an inventive step (Article 33(3) PCT).

The closest prior art is represented by D1 relating to alpha 7-nicotinic acid receptor binding agents for treating and preventing dementia (e.g. Alzheimer's disease), cognition disorders, anxiety, depression, schizophrenia, epilepsy, pain, Tourette's syndrome, Parkinson's chorea or Huntington's disease (cf. abstract and pages 111-131).

The present compounds differ from the compounds of D1 in the residue $-Ar^1-A-Ar^2$ comprising two (hetero)aromatic rings whereas the corresponding residue Ar of D1 is more generically defined as substituted phenyl or optionally substituted aromatic heterocyclyl or bicyclic carbocyclyl.

Consequently, the subject-matter of claims 1-16 and 22 consists in the selection of a subgroup of the compounds described in document D1. Such a selection can only be regarded as inventive, if the subgroup presents unexpected effects or properties in relation to the rest of the range. However, no such effects or properties are indicated in the application. Hence, no inventive step is present in the subject-matter of claims 1-16 and 22.

The claims 17-21 and 23-29 would only involve an inventive step if the product claims fulfilled the said requirement.
